

Responsible Alpha is a minority-owned EU-North American based B corp “public benefit corporation” whose team has over 200 years' direct global sustainability consulting experience in their careers deploying billions in sustainable capital. Responsible Alpha is proudly owned by its staff, advisors, and board members.

CORPORATE REPORTING

Simplify your sustainability reporting process and communicate results effectively. Responsible Alpha writes and designs sustainability reports helping organizations measure, understand, and communicate their non-financial performance with internal and external stakeholders. Our framework helps you demonstrate leadership and accountability in sustainability. We bring 80 years of experience to optimize your reporting progress.

SUCCESSES

- **SEC Climate Disclosure Economics Analysis:** Developed SEC climate risk and economics disclosure analyses and risk case studies used by 123 global institutions. Our research provided rigorous assessments of climate-related financial risks, offering actionable insights for policymakers and investors to drive accountability in corporate reporting practices.
- **ESG, SDG, & Climate Integration:** Enhanced a large global NGO's performance through comprehensive ESG, SDG, and climate risk modeling and financial restructuring strategies, utilizing surveys and in-depth analysis to map internal policies against ESG, SDG, and climate risk metrics. Our data-driven framework linked organizational policies and its \$250 million annual budget to quantifiable financial and sustainability outcomes.
- **Sustainability Consultancy B Corp and GRI Sustainability Reporting:** Successfully led a sustainability consultancy's B Corp application and reporting, and annual GRI sustainability reporting. Both initiatives led to enhanced staff engagement, better market positioning, improved risk management, and better outcomes for shareholders and stakeholders.
- **U.S. Utility Environmental Justice Climate Risk Analysis:** Assessed climate-related environmental justice risks for a large U.S. utility, analyzing how physical climate impacts disproportionately affect vulnerable communities within the utility's service territory. This case study provided standardized frameworks for assessing and reporting climate vulnerabilities, supporting corporate disclosure initiatives and regulatory compliance across multiple industries and sectors.
- **Financial Accounting Natural Capital Reporting:** Authored numerous comprehensive analysis of financial accounting standards for natural capital assets. Our research provided corporations and investors with frameworks for accurately valuing and reporting natural capital assets, biodiversity impacts, and deforestation risks in financial statements, advancing transparency in sustainability-related financial disclosures.
